SUBCELLULAR LOCATION. OUTER MEMBRANE.

MISCELLANSOUS: THIS PROTEIN IS SUBJECT TO PHASE-VARIABLE
EXPRESSION ASSOCIATED WITH ALTERATION IN THE LENGTH OF THE CCAA
REPEAT REGION. THIS MECHANISH IS CALLED SLIPED-STRAND MISPAIRING.
ADDITION OR LOSS OF CCAA REPEAT UNITS GOULD CHANGE THE READING
FRAME AND RESULT IN INTRODUCTION OF STOP CODONS DOWNSTREAM OF THE
REPEAT REGION. THIS MAY BE A MECHANISM OF REGULATION AND
ANY TO AVOID THE INMUNCAGICAL RESPONSE OF THE HOST.

SIMILARITY: BELONGS TO THE TONB-DEPENDENT RECEPTOR PROTEIN FAMILY:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 s SWISS-PROT entry is copyright. 1 FUNCTION: MEMBRANE GITCOPROTEINS IMPLICATED IN THE PATHOLOGIC DEPOSITION OF CHOLOGICENTE ATTENIAL WALLS DURING ATHERCGENESIS. TWO TIPES OF RECEPTOR SUBUNITS EXIST. THESE RECEPTORS MEDIATE THE ENDOCYTORIS OF A DIVERSE GROUP OF MACROALECULES, INCLIDING MODIFIED LOW DENSITY LIPOPROTEINS (LDL).

1 SUBUNIT: HONOTRIBER.
1 SUBUNIT: HONOTRIBER.
1 SUBULITATE PRODUCES: 2 150FORMS; I (SHOWN HERE) AND II; ARE PRODUCED BY ALTERNATIVE BELICING.

FUNCTION: PROBABLY PART OF A HIGH-APETINITY TRANSPORT SYSTEM.
SUBCELLILAR LOCATION: INTERAL MEMBRANE PROTEIN (POTENTIAL).
SIMILARITY: HITH HIFERAL MEMBRANE COMPONENTS OF OTHER BINDING.
PROTEIN-DEPENDENT TRANSPORT SYSTEMS. CONTAINS TWO DOMAINS.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          ; X14140; CAA32358.1;

-1- FUNCTION: THIS RECEPTOR BINDS POLYMERIC IGA AND IGM AT THE
BASOLATERAL SURFACE OF EPITHELIAL CELLS. THE COMPLEX IS THEN
TRANSPORTED ACROSS THE CELL TO BE SECRETED AT THE APICAL SURFACE.
DURLING THIS PROCESS A CLEAVAGE OCCURS THAT SEPARATE THE
EXTRACELLULAR (KNOWN AS THE SECRETORY COMPONENT) FROM THE
TRANSPORTED AT THE SECRETORY COMPONENT) FROM THE
TRANSPORTED THE SECRETORY COMPONENTS OF THE TRANSPERS OF THE SECRETORY COMPONENTS OF THE TRANSPERS OF THE SECRETORY COMPONENTS OF THE TRANSPERS OF THE SECRETORY COMPONENTS OF THE TRANSPERS OF THE SECRETORY COMPONENTS OF THE TRANSPERS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECRETORY COMPONENTS OF THE SECR

No. is the number of results predicted by chance to have a
score greater than or equal to the score of the result being printed
and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                             of hits satisfying chosen parameters:
